### NATIONAL SEMINAR ON

# Role of Science and Technology Rural Development

11<sup>th</sup> - 12<sup>th</sup> November, 2019

Venue : Senate Hall, University of Rajasthan, Jaipur

### Organised by

Indian Science Congress Association (ISCA)  
Jaipur Chapter

### Host Institution

University of Rajasthan  
Jaipur

## INDIAN SCIENCE CONGRESS ASSOCIATION (ISCA)

Indian Science Congress Association (ISCA) has its origin to the foresight and initiation of two British Chemists, namely Professor J. L. Simonsen and Professor P. S. MacMohan. Its first meeting was held at Kolkata in 1914. For the advancement of science in the country this is biggest scientific body. Scientists and researchers can present their findings in 14 different sections of Annual session held every year during 3rd- 7th January. From this modest beginning with hundred and five members and thirty five papers communicated for reading at the first session, ISCA has grown into a strong fraternity with more than forty thousand members. There are 25 ISCA local chapters which started organising popular science lectures in different centres in India from 1962-63. The scheme envisages constructive work for the popularisation and advancement of science throughout the year. One of the major objectives of the ISCA is to inculcate the scientific temper among the people and to encourage young scientists to grow up steadily in this direction.

## UNIVERSITY OF RAJASTHAN

The University of Rajasthan is a vibrant community of scholars who stand in the service of Rajasthan as a whole. The University of Rajasthan is the oldest institution of higher learning in Rajasthan. It was established on 8th January 1947, as the University of Rajputana with the main objective of disseminating knowledge. It attracts students from all over Rajasthan and other parts of India and abroad. Besides focusing on dissemination of knowledge and search for excellence in teaching and research the University prepares the students as good future citizens and endeavours to inculcate amongst them a sense of discipline and dedication. The university is transforming its curricular activities keeping in view the recent trends of development.

## ABOUT THE SEMINAR

Rural development is the process of improving the quality of life and economic well-being of people living in rural areas. Education, entrepreneurship, physical infrastructure, and social infrastructure all play an important role in developing rural regions.

There has been remarkable development in education, communication, agriculture, industry etc. the global economic output has increased 17 folds in the 20th century. In spite of the advancements in almost all sectors, still the world is not free from hunger, disease, pollution, illiteracy and poverty. The gap between the rich and the poor has widened. By the 21st century, with the right applications of research, development, and implications of science and technology a major difference could be brought about.

Modernization in every aspect of life is the greatest example of the implementation of science and technology in every nation. With the introduction of modern gadgets in every walk of life, life has become simple and it has been possible only because of implementing science and technology together. The role that science and technology has played in improving the life conditions across the globe is vivid, but the benefit has to be harvested maximum by all countries.

Development of India and development of Science in India, both require that we focus on giving the methods of Science and Technology to our vast population that are lives in villages. This being the focal theme of 107th Indian Science Congress. ISCA Jaipur chapter is organized a two day seminar cum exhibition on the focal theme "Science and Technology-Rural Development". The participants will include U.G. level students, participants for exhibition from schools and invited speakers on focal theme. The seminar will provide an opportunity to academicians, professionals and researchers to exchange views on the role of "Role of Science and technology:Rural Development".

## CALL FOR ABSTRACTS

Abstracts are invited for poster presentation (from Physics, Chemistry, Botany, Zoology or any other related sciences) with a primary objective of providing an opportunity to interact with peers on individual basis. Kindly ensure that emphasis is made on the focal theme viz "Role of Science and Technology : Rural Development " Authors are invited to submit abstracts in about 250 words, to the organising secretaries. The text should be typed in the 12 point , Arial Font with single line spacing. The mailing address of the corresponding author should be provided in the abstract. Last Date of Receiving Abstract is 05th November, 2019

## REGISTRATION DETAILS
